NOLAN | N104P

Modular Helmet

Full Face Helmet

Features:

- Nolan N104P is a Modular and Full Face Helmet.
- Produced in two outer shell sizes (XXS-L / XL-XXXL) of injection polycarbonate GE Lexan keeps the helmet's weight to a minimum.
- New in the N104P is the dimensionally correct sizing allowing ample cubic volume in the chin/nose area.
- The (patented) chin guard rotation movement with elliptical trajectory makes it possible to keep the total size of the helmet's front section to a minimum. The "sail" effect is highly reduced and riding comfort is unaffected when the chinbar is in the up position.
- The New N104P is P/J approved in both ECE and DOT standards. P/J approval allows the motorcyclist to ride with the chin guard open or closed.
- UV400 outer lens and Pinlock anti-fog lens included.
- Ventilation is achieved through the AIR BOOSTER system. The innovative ventilation system is also equipped with an air intake in the chin guard, an air intake in the frontal area and two rear extractors.
- The exclusive (patented) DUAL ACTION chin guard opening system is positioned in the center of the chin guard, allowing for easy, one-handed opening of the chin guard.
- The ultra wide visor assembly on the N104P is the largest of any Nolan, both vertically and laterally, increasing safety by providing superior vision.
- The internal sunscreen on the N104P is easy to activate. It allows automatic and immediate retraction of the screen via a push button release on the bottom edge of the helmet. To lower the inner shield, a slider bar is used.
- The inner comfort lining features removable cheek pads, inner liner, neck roll, and wind protector.
- Sell and install Setcom Helmet Communication Headsets.
- Apply department supplied decals and lettering under clear hard coat.
- Standard Black & White, High Trim or Low Trim Styles
- Custom colors and trim styles available.
- Sizes: XS - 2XL (6 5/8" - 8 1/8")
- Call for a sample or more information
- 5 year warranty
