

# HELMETS

## MOUNTED POLICE HELMETS

### MODEL # S1616 & S1617

CERTIFIED TO ASTM F1163  
HORSE RIDING STANDARD

S1617

S1616

**OUTER SHELL:** The outer shell is made of lightweight fiberglass. The shell is offered in sizes small, medium, large, and extra large. There is an integral or a snap on visor that comes with the helmet. The edge of the shell is finished with a tough molded metal core scuff-proof edging. The shell finish is made of a Polane and Urethane that helps prevent chips in the paint. The shell is available in a wide array of standard as well as custom colors. The paint is protected by a clear hard coat, scratch-resistant coating.

**LINER:** The interior of the outer shell is lined with a dual-density EPS/Urethane semi-resilient material of approximate .90" thickness. Liner material to be unaffected by temperatures ranging from +14°F to +122°F. The liner is sealed off by an inner, semi-rigid, floating A.B.S. Plastic shell of .030" or more wall thickness which allows thorough sanitation and prevents indiscriminate deterioration of the liner.

**SUPERIOR VENTING:** Accomplished by several different options. All Vented helmets have an Air Channeled Interior that permits cool air circulation across the entire head. Whether front vents, rear exhaust vents, or 4 top vents, the helmet provides effective cooling for all riding conditions.

**SUSPENSION:** Within the inner shell are three different interior choices all allowing ventilation and are adjustable to all common head sizes. The three interior choices available are: (1) Adjustable Headband with a suspended crown pad; (2) Cushion Pad interior with Velcro attached sizing pads; (3) Foam Padded interior comfort liner. Interiors shall be removable for cleaning and replacement.

**RETENTION:** Sewn naugahyde shaped as a letter "Y" to allow hearing, and is riveted to the outer shell. The throat strap is made of nylon tubular webbing that utilizes a Comfort Throat Sleeve, adjustable fastener and quick release snap fastener. Quick release buckles are also available and provide instant release. A nape strap on the back of the harness is also included on the helmet. This strap eliminates the rolling of the helmet forward or backward keeping the helmet completely secure on the head while performing duties. The harness has provisions for Velcro attachment of accessories such as ear muffs, and foul weather adapters.

**VISOR:** Model S1616 features an integral visor while the Model S1617 has a snap-on visor. Rank bands are available in gold or silver.

**TACTICAL DUTY ACCESSORIES:** The helmet has provisions to attach riot gear such as face shield and ear/neck protector.

# DUAL PURPOSE RIDING & RIOT HELMET

S-5005G SR Shield

S-5005G E Shield

S-5026 Shield

All Seer Mounted Helmets come with provisions to attach Riot Faceshields and Tactical Duty Ear and Neck Protectors. The S-5005 Shields (\$30) are the most common riot shields used. The S-5005G SR Shield snaps onto the front of the helmet and uses a thumbscrew and an integrally installed Tric Nut to secure the shield to the shell. The Tric Nut is installed into the fiberglass shell during manufacturing. When the shield is not on, the tric nut virtually disappears. There are no cumbersome brackets for retention of this shield. The S-5005G E Shield snaps onto the front of the helmet and has an elastic band that helps hold the shield in place. The S-5026 Shield (\$37) clips onto the front of the helmet. This shield utilizes the Thumbscrew and Tric Nut attachment.

The S-5026 has a liquid beak seal that protects the Officers face from foreign liquids during riot situations. The S-1286 Tactical Duty Guard (\$28) is a hard plastic protector that snaps on the outside of the harness. The foam on the inside helps cushion the Officers face in the event of a blow. The Seer Riot Package (S-1000, \$58) combines your choice of shield (S-5005G E or SR) with a Tactical Duty Guard, and also includes a helmet cover for riot situations.

# COOLING & VENTILATION

## **OPTION 1:**

Seer Mounted Helmets have many different options when it comes to cooling. All vented helmets have Air Channeled Interiors. These air channels allow the air to circulate without restrictions. The vents allow for maximum air flow by having no restrictions between the outside air and the wearers head. There are three different venting options: 1) Front Vents; 2) Front and Rear Vents; 3) Four Top Vents.

## **OPTION 2:**

1) Two Front Vents are positioned right above the eye brows. They allow air intake and circulation on the inside of the helmet.

2) Front and Rear Vents work together to draw air in through the front and exhaust the hot air out the rear of the helmet.

3) Four Top Vents allow for maximum hot air exhaustion off the top of the head.

All of the above options are available on the Seer Mounted Helmet. For those climates that are hot in the summer and cold in the winter, optional slide vents are a great option. Call for vent option information and pricing.

## **OPTION 3:**

# ***MOUNTED HELMET COMMUNICATIONS***

Increase Officer safety with Mounted Helmet Comm Kits. The Single or Dual Speaker Setcom Helmet Kit allows the officer to communicate and listen more clearly, using their current portable radio, while keeping the helmet on. This setup requires: S-9099-2 Adapter, KE-13 Helmet Kit (Single Speaker, or Dual Speaker), and Super (Shoulder) Mic. Call for more information.

# ***MOUNTED HELMET ACCESSORIES***

Seer Mounted Helmets can be equipped at any time with the optional, removable Foul Weather Adapter (S-1282 \$26). This Fur Lined accessory attaches with Velcro on the inside of the harness to cover your ears and the back of your neck in inclement weather.

Seer Mounted Helmets can be equipped at any time with the optional, removable Ear Muffs (S-1275 \$24). This Fur Lined accessory attaches with Velcro on the inside of the harness. It covers your ears and helps to keep them warm in inclement weather.

## ***DEPARTMENT SPECIFICATIONS***

Since each Seer Mounted Helmet is made one at a time, by hand, there is no minimum order quantity. This allows us to make each helmet superior. Whether it is custom paint/trim options, pinstripe, or department decals, we make the helmet to Department specifications. During manufacturing we can apply department supplied decals to the helmet, and clearcoat over it. We also have reflective tape (\$12) that helps increase officer visibility. Call for more information.

## ***MOUNTED UNITS***

Many Mounted Units across North America trust Seer Mounted Helmets for their officers. Such departments include: Denver, Los Angeles County, Las Vegas Metro, Chicago, Massachusetts State Police, Boston Police, Boston Park Rangers, Toronto, Vancouver, Baton Rouge, St Louis, Indianapolis, Kansas City, Harris County TX, Louisville KY, Ft Lauderdale, Minneapolis, Memphis, Ascension Parish, Allen County OH and many others.
