**FEATURES:**

- **Uni-directional Advanced Composite Carbon Fibers** are used to maximize weight reduction. The resulting helmet weight is reduced by 6 – 10oz.

- **Custom designed fiber angles** are used to maximize strength and improve impact performance.

- A consistent shell thickness is achieved utilizing an all **Uni-directional Aerospace Layup** technology.

- The **low-profile**, long-oval aerodynamic shape improves fit and appearance for longer more comfortable rides.

- **Comfort-Max Liner** is lightweight, breathable and features a soft Suede 4-way stretch fabric. Aero-spacer fabric and open cell foam allow air to pass through the liner keeping the head cool and comfortable. The liner is thermo-formed, removable, washable and replaceable and is available in 1/4” and 1/2” foam thicknesses. The adjustable headband suspension, cushion pad, and brushed nylon interiors are also available and include moisture wicking, anti-bacterial, anti-microbial fabrics.

- **Micro-Metric** quick release buckle is made from stainless steel and provides easy adjustment of the chin strap.

The Seer S2102 / S2108 are an excellent choice for a motorcycle officer or a recreational rider that desires a lightweight comfortable helmet. The S2102 helmets include a snap-on visor, an open ear harness and a variety of color and trim options. The S2108 helmets include a non-removable black patent leather visor, a closed ear harness, and a variety of color and trim options. The Seer S2102 / S2108 are manufactured at the Super Seer helmet factory Evergreen, Colorado using raw materials sourced in the United States. The Seer S2102 / S2108 are **Made in the U.S.A.**
